With the acceleration of technological development we are reaching the point where our systems and their what people depend on in them? In this paper we describe an approach for dynamically restructuring user raises the question of how can we maintain, extend, override, and adapt these systems while preserving user interfaces become to some degree outdated 'legacy systems' as soon as they are released. This interfaces into a set of communicating processes that 1) provide methods for changing the ...

Keywords: content repurposing, interactive public displays

Interactive systems in public places: Sharing multimedia content with interactive public displays: a case study S
